

# BCCP Web Scraping Course

Kevin Tran      Julian Harke

23 - 26 June 2019

## 1 Description

Web scraping course

## 2 Prerequisites

We will give you a "very short introduction to python". Nevertheless, it will be easier to follow if you know some basic concepts of Python.

Basic concepts that are useful:

- How to load packages in python.
- How to write a function in python.

These basic concepts are covered here: [LINK](#)

## 3 Further reading

- **Cookiecutter Data Science Project Template**  
Templates to build an initial project structure.

## 4 Schedule
